

Trim Series

Metal composite packing

Trim Series is airtight, watertight, and dust resistant. Its installation is simple as it does not use adhesives. The clips ensure easy installation on metal or plastic plates. No holding is required because adhesives are not used.

Features

Physical strength

It realizes high impact strength by the metal flange attachment. The resin types or rubber types can be chosen according to the requirements.

Easy installation

Trim Series can be used as a packing material for flanges of metal flanges or plates, test equipments, and switchboards. It can flexibly bend around curves.

Recyclable

No migration occurs because Trim Series does not use any adhesives. It can be easily recycled since it is removable.

Coloring

Resin types can be colored (please contact us for any queries that you may have).

Applications

Trim Series is widely used in test equipment, electronic devices, appliances, construction, buildings, automobiles, disaster-related products, signs, outdoor products, sundries, etc.
